JESUS MENDOZA

832 952 8939   jesuszmendoza14@gmail.com

INTRODUCTION

Summary

A focused and self-motivating **Front-End Developer** with well rounded knowledge and experience with modern front-end technologies. Friendly, adaptable and eager to learn and build the next generation of websites.

Skills

HTML, CSS, JavaScript, ReactJS, NodeJS, Object-Oriented Programming, Express, Pug, API usage

PROJECTS

React Gallery App

A search engine web app that utilizes flickr's API to find and display photos in a masonry grid. Equipped with default search links, error feedback and a responsive dark user interface built with ReactJS.

Le Grain De Cafe

A design-responsive static website that promotes a small coffee business. Contains images, product slider, location and form page.

Form Validation

A conference fill-out form that processes and validates user data such as email, payment information and course selection. Built with jQuery.

List Pagination & Filtering

List of students paginated into groups of ten. Search bar included to filter and return desired student. Amount of pages adjusts to the number of students displayed.

EXPERIENCE

Data Transformation Associate
September 2016 - Present

Transform paper documents to digital format. Perform QC procedures to ensure accuracy of data. Handle, gather and prepare boxes for shipment. Travelled locally for offsite contract labor.

EDUCATION

Full Stack JavaScript TechDegree
November 2018 - Present

This course focuses strongly on the front and back end of JavaScript. I've learned language syntax, ecosystem, modern features, popular libraries and frameworks to create solutions for current front end challenges.
