J

Programming Experience

Course Education Platform 🗗

A React client for users to login and create, discover, and modify class courses. The client is connected to a REST API Sequelize database which handles all queries, validations, and modifications towards the user data.

> CSS, React, Node, Express, Sequelize

Rains Ecommerce App 🗗

An ecommerce app that mimics the "Rains" clothing brand UI. Built with a strong focus to function on all browsers and mobile devices. User can view, add, update quantity, and remove products from a cart system.

> CSS, React

Employee Directory 🗗

A list of clickable cards within a grid that displays random employee data. Each card contains data pulled from the "randomuser" third party API.

> CSS, JavaScript

SQL Library Manager 🗗

A library database manager built with Sequelize. Items are structured within a table. View, add, update, and delete items from the system. Wrapped in a dark UI.

> CSS, Node, Express, Pug, Sequelize

Flickr Gallery Search 🗗

A React search engine that let's the user search for any photo within Flickr's API database. Incoming images from the database are displayed on a masonry grid for a better user experience.

> CSS, React

Sign Up Form 🗗

A sign up conference fill-out form that validates and processes user information. Form will check for various fields such as email, required course selection, and credit card information.

> CSS, jQuery
